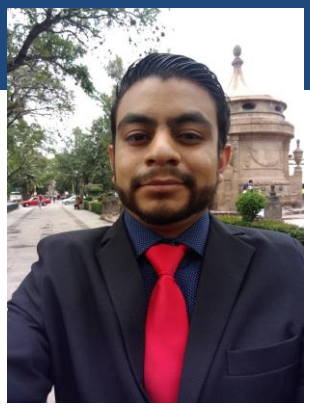
Mario
Hernández Martínez

Full Stack Developer (.NET / C#) | SQL Server | REST APIs | IT Infrastructure



ABOUT ME

Software Developer with 5+ years of experience in IT infrastructure and software development. Specialized in building business applications using C#, .NET, SQL Server, and modern web technologies such as Vue and Astro. Strong background in server administration, database optimization, REST API development, and production environment management.

Experienced in developing scalable systems, automating reporting processes, and improving operational efficiency. Focused on delivering reliable, high-performance solutions aligned with business objectives.

WORK EXPERIENCE

GRUPO ABG – Jr. Developer & IT Support
Jan 2021 – May 2023 | Jan 2024 – Mar 2026 *San Luis Potosí, México*

Developed a payroll control system using C# and SQL Server.
Designed and optimized SQL queries and stored procedures for reporting efficiency.
Implemented reporting modules using Crystal Reports.
Managed Windows Server environments (2003–2022).
Provided technical support and infrastructure maintenance in production environments.

REYNOSO INTERNACIONAL SYSTEM - Development Coordinator
May 2023 – Jan 2024 *San Luis Potosí, México*

Developed inventory management software for inbound and outbound logistics operations using C# and SQL Server.
Designed database structures and optimized queries to improve transaction processing efficiency.
Coordinated and supervised junior developers, improving workflow organization and reducing project delivery time from 7 to 6 months.
Gathered technical requirements and translated business needs into functional software solutions.
Participated in testing, debugging, and deployment in production environments.

PAPELERÍA "OIE-ME IMPRIMES" - Owner / Business Manager
Mar 2017 – Jan 2020 *San Luis Potosí, México*

Managed business operations, inventory control, and financial administration.
Supervised personnel and coordinated daily operational activities.
Implemented process improvements to optimize resource allocation and workflow efficiency.
Handled customer service and supplier negotiations.

Key Project

COA reporting
Designed and implemented a policy integration system in 1 month using C# Windows Forms and Oracle database connectivity.
Built a REST API using Express.js deployed with Docker to automate data ingestion.
Implemented data transformation using dictionary-based mappings in C#.
Managed source control with GitHub, enabling version rollback and collaborative development.
